

Multiple screens help you work smarter and more productively, but they take up valuable desk space. The Novus MY system of monitor mounts and tablet holders offers a creative solution. The MY twin arm allows you to easily elevate and position two devices to keep your workspace less cluttered and more functional.

The NOVUS MY twin arm provides a simple way to raise two screens off the work space and allow for more positioning. The mounts hold monitors weighing up to 11 pounds and also accept

the MY tab tablet holder. The set includes a single MY column and two articulating MY arms with monitor mounts. Adjust for height up to 13.75", up to 16" of arm range, and monitor tilt/turn for a perfect ergonomic fit.

The MY column is constructed of strong anodized aluminum for stability. The MY twin arm is available in silver or white. Four surface mount options accommodate a variety of work surfaces and configurations. Cable routing clips are provided and ensure an organized appearance.

Base Option	Silver	Range
System Clamp 1	910+2219+000	16.34"
Grommet	910+2259+000	16.34"
Drilling Screw	910+2249+000	16.34"
System Rail	910+2269+000	16.34"
